About This Game

Welcome to the Trailblaze Tournament! Get ready for high-speed thrills with an explosion of colour in Trailblazers, the first-ever second-to-second co-operative arcade racer. Paint the track as you go to dynamically change the racing line, boost on your team's colour and outwit the opposition in a sprint for the finish. The more you paint, the faster you can go!

Trailblazers is an innovative co-operative racer with groundbreaking on-track gameplay. Racing in teams of up to three-versus-three, players paint the track to create the best racing line, then use that paint to boost up to insane speeds. Drive with flair and style to gain skill points and blaze your way to victory! Experience blistering high-speed action with up to six players online, or locally via split-screen for up to four local players with additional online or AI-controlled challengers.

- Paint the track as you race and create your own dynamic racing line to boost on... no two races are ever the same!
- Work together with your teammates to paint, boost and race better than your opponents, racking up points for driving with skill and flair.
- Multiple game modes - 3-on-3, partner races, solo sprints and more - plus a full story campaign to discover.
- Play solo or split-screen with friends either locally or online against people from all round the world - including cross-platform!

(Cross-platform play links PC/Mac/Linux players to either PlayStation®4 or Xbox One/Nintendo Switch players - see in-game options for details)

Title: Trailblazers
Genre: Action, Casual, Indie, Racing, Sports
Developer:
Supergonk
Publisher:
Rising Star Games
Release Date: 8 May, 2018

b4d347fde0

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7 64 Bit/ Windows 8 64 Bit/ Windows 10 64 Bit

Processor: Intel Core i5 or equivalent

Memory: 8 GB RAM

Graphics: NVIDIA GeForce GTX 650 or equivalent

DirectX: Version 11

Storage: 3 GB available space

Sound Card: Any compatible soundcard

Additional Notes: Gamepad required

English,French,Italian,German,Japanese

Its a fun racing game with some unique mechanics. The cars handle well and its pretty fun to play. The only downsides so far have been some progress resetting (patched about a week after launch) and the required use of a controller. I prefer controller so it doesn't bother me but more options are always better. It also be nice to be able to remap controls but sadly you can't.

Overall though very enjoyable and worth the asking price.. Its a fun racing game with some unique mechanics. The cars handle well and its pretty fun to play. The only downsides so far have been some progress resetting (patched about a week after launch) and the required use of a controller. I prefer controller so it doesn't bother me but more options are always better. It also be nice to be able to remap controls but sadly you can't.

Overall though very enjoyable and worth the asking price.. Painting Mechanic is broken on Linux since the launch. A fix was promised but no updates since over a month:

<https://steamcommunity.com/app/621970/discussions/0/1696046342874367352>. Everytime you launch the game settings are reset and your progress is erased. Major bug and no word from the developers yet.. The issues with settings not saving aside: the gameplay is really fun and the soundtrack is awesome.

Great game, crossplatform online play works really well, single player missions provide a nice challenge too. The paint mechanics and scoring system in this game give a lot more depth to the race than just speed as fast as you can and get in first. The game did have some bugs when it first came out, but most of them were squashed straightway.

As for cons right now there is a lack of players, although the crossplatform multiplayer helps some with that. Some people may not like that fact that it requires a controller to play. Also more clarification on how the scoring system works would be nice, as the tutorial did not give many details on this. Sound settings don't seem to want to save when in a race, but I got around that by adjusting it through the system.

As a side note, the game only has 10 tracks, each with a reverse, mirror, and mirrored reverse variant. Personally I don't feel like more tracks are needed, but some might disagree, so I figured I'd mention this. Also for linux users I'd give a word of warning: some linux users were experiencing a bug where the car appears to paint all the time. I personally have not run into this issue, but the devs did communicate with others and seem to be working on a fix, if it hasn't come out already.

I would most certainly recommend the game. Although if any of the issues mentioned before might steer you away, I'd keep a lookout for when they do get fixed, then buy it.. Awesome concept, neat design, and was very much looking forward to playing, however...

After spending some time with the game, closing it then returning a short time later, all progress/my save game and options had been reset. Checked the Steam Forums, and I'm far from the only one that this has affected.

C'mon, Devs - it's a full-release where saving your game doesn't work. Way to put a dampner on the experience.

Refunded, and will probably just wait for a sale.. really fun mash up of death sled racing games and splatoon. the only downside is that resolution settings dont save for some reason, but really fun and unique racer. Splatoon meets F-Zero with crossplay. Controls are tight, aesthetic is tight and this game will hopefully continue to scratch my itch for a new Blur. Highly recommend.

<https://youtu.be/Mo7zDpEUUJo>. Everytime you launch the game settings are reset and your progress is erased. Major bug and no word from the developers yet.
